

AMENDMENTS TO THE CLAIMS:

Please replace the claims with the claims provided in the listing below wherein status, amendments, additions and cancellations are indicated.

1. (Cancelled)

2. (Currently Amended) A rotational sliding switch ~~according to claim 1,~~
comprising:

a pole base on a fixed side supporting fixed contacts;

movable bases that support movable contacts and can move
rotationally so as to cause the movable contacts to slide under a prescribed contact
pressure against said fixed contacts;

a rotation position of a side to be detected being detected by a sliding
position of the movable contacts with respect to said fixed contacts, wherein

said fixed contacts are provided on each of two side surfaces of said
pole base; and

the movable bases are arranged singly on each of the two side
surfaces of the pole base, wherein

one of said movable bases is joined to a manual shaft of an automatic transmission, and the other movable base is mated with a plate rotating together with said manual shaft.

3. (Original) A rotational sliding switch according to claim 2, wherein

said plate is a detent plate for determining each rotation position of said manual shaft with respect to the fixed side.
